

DYNASPLINT SYSTEMS, INC.

Stretch Beyond Your Expectations.®

Significantly improve patient outcomes while decreasing time and cost associated with range of motion rehabilitation.

orthopedic

The orthopedic rehabilitation products from Dynasplint Systems, Inc. have been instrumental in accelerating patient recovery over the last three decades. For recovery from injury, trauma, surgery or disease our orthopedic rehabilitation system can help your patients regain their full range of motion.

features and benefits—

- LLPS (Low-Load, Prolonged-Duration Stretch) technology has been proven to successfully treat joint stiffness and limited range of motion
- Early application can reduce time and cost associated with range of motion rehabilitation
- Simple, adjustable and reproducible bilateral tensioning system
- Reimbursable through most insurances
- Biomechanically correct
- Comfortable and worn at rest
- Each Dynasplint® System is recycled to reduce waste and help the environment
- A Dynasplint sales consultant will fit your patients and oversee their treatment to ensure the best possible results
- Over a half-million patients have been successfully treated with Dynasplint Systems
- Conveniently labeled, easy to use and online patient friendly video instructions
- Available for adult, pediatric and infant patients
